Early Adopters Program

This program is for made for people who wish to obtain our technology first.

May Realities is offering our AR-Smart-Glasses, along with this our companion software to be used by Early Adopters.

Reality Lens

A Pair of Augmented Reality Smart-Glasses.

More About Reality Lens

The Reality Lens is a peripheral Augmented Reality Display made to connect with any device.

Reality Lens gives you the ability to see anything in Augmented Reality.

Another value of the Reality Lens is its strong connection with the cloud.
Giving you the ability to save everything you do without worry of storage space.

Specifications of Reality Lens

~150 Field of View

2k Resolution

90 Frames per Second

7 inch Glass Display

Fully Wireless Charging

Hand and Motion Tracking

May

The Companion App for the Reality Lens

May is used to connect Reality Lens to a users device. May allows the user to mirror the screen of the device using May to the Reality Lens. May is what allows you to see anything you want in Augmented Reality.

Benefits of being an Early Adopter

Being able to have all of our devices before anyone else.

Having an influence of how our technology is made.

15% off any May Realities product you're an Early Adopter on
